

# 12 × 60W LED MOVING BAR

## WITH AUXILIARY LIGHTING

### PRODUCT SPECIFICATION

## PRODUCT OVERVIEW

A multi-head LED effect light combining independent head movement, wash and beam effects. Twelve 60W RGBW LEDs are complemented by dedicated golden-yellow and cool-white auxiliary LEDs for dynamic stage looks.

## KEY FEATURES

- 12 independently moving LED heads with RGBW color mixing.
- 432 golden-yellow LEDs + 432 cool-white LEDs (2015 package).
- 32-bit linear dimming, 1–30Hz strobe and six DMX channel modes.
- DMX512 and RDM support; Auto, Master/Slave and Sound Active modes.

## APPLICATIONS

Indoor stage shows, clubs, parties, weddings and event lighting.

## DIMENSIONAL SCHEMATIC

Overall dimensions: 1000 × 300 × 165 mm. Schematic only; orientation and mounting details to be confirmed.

### TECHNICAL PARAMETERS

|                         |                                                                 |
|-------------------------|-----------------------------------------------------------------|
| Input Voltage           | AC100–240V, 50/60Hz                                             |
| Power                   | 800W total; 12 × 60W main LEDs                                  |
| Main Light Source       | 12 × 60W RGBW 4-in-1 LEDs                                       |
| Auxiliary Light Sources | 432 × 2015 golden-yellow LEDs and<br>432 × 2015 cool-white LEDs |
| Control Modes           | DMX512, Auto Run, Master/Slave, Sound Active, RDM               |
| DMX Channels            | 29 / 62 / 170 / 254 / 308 / 332 CH                              |
| Dimming                 | 32-bit, 0–100% linear dimming                                   |
| Effects                 | Independent LED head movement, wash and beam                    |
| Strobe Frequency        | 1–30Hz                                                          |
| Operating Temperature   | -30°C to +50°C                                                  |
| Housing                 | Metal, black finish                                             |
| Connections             | DMX512 input/output; power input/output                         |
| IP Rating               | IP20                                                            |
| Dimensions              | 1000 × 300 × 165 mm                                             |
| Net Weight              | 26.5 kg                                                         |
| Packing Dimensions      | 112 × 39 × 27 cm                                                |
| Gross Weight            | 29.55 kg                                                        |

### INSTALLATION ENVIRONMENT

IP20: intended for dry indoor use. No water protection is specified.

### DATA NOTES

The 800W figure is the stated total power; 12 × 60W describes the main LEDs.

A manufacturer model code was not provided. This sheet identifies the product by its light-source configuration and auxiliary lighting.

Images illustrate the supplied product. Confirm the final configuration before ordering.
